

Step by Step Instructions

How to begin

Print out our template (page 3). Cut out the pieces and trace the shapes to matching papers.

Trace the leaves on green paper, the flower on one of the "daffodil" ones, choose another darker "daffodil" shape for the spiral and yellow for pistil. Cut out the parts, cut fringes on the small rectangle (see photo 1a).

Step 1 - Cut out the shapes

Let's make the petal. Take the flower part and make folds between every petal.

Step 2

Apply a small amount of glue on the "half petal" shape.

Step 3

Push the "half petal" part with the glue under the petal on it's left. This will create a flower shape.

Step 4

Now to make the inner petals. Take the spiral and start rolling it from from it's outer side towards the center.

As you reach the center, apply a small amount o glue to the end of the spiral and push it under the rolled "flower". Hold together for a while for the glue to set.

Step 5

Now take the rectangle and roll it together into a small tube (glue!).

Dip the center part of the flower in a bit of glue and stick it into the rolled petals part.

Apply a generous amount of glue in the middle of the large petal and press the small spiral petal on the glue. Let the glue set.

Step 6 Finishing touches

Time to make the paper daffodil even fancier. Fold each of the petals backward a bit.

Almost done

Grab the sides of the tip of each petal with two fingers and squeeze it. This will make a nice textured pointy tip.

Finishing details Stick a leaf or two on the bottom.

All done! You learned how to make paper daffodils.
