## Guidelines for the Completion of the Health and Safety Risk Assessment Form

**All Risk Assessment forms must be completed and returned prior to your event taking place.**

HAZARD	WHO MIGHT BE HARMED	IS MORE ACTION NEEDED TO CONTROL THE RISK
Look only for hazards that could reasonably expect to result in significant harm under the conditions in your work area. Use the examples below as a guide.	No need to list individuals by name, just think about groups of people doing similar work or who may be affected.	Do the precautions already taken for the hazards listed on the risk assessment form....
Slipping/tripping Chemicals (e.g. cleaning products) Moving parts of machinery (e.g. blades) Pressure systems Vehicles Electricity Dust Fumes Manual handling Noise Lifting operation	Members of the public Maintenance personnel Operators Cleaners Staff People with disabilities Children Visitors Inexperienced staff Volunteers Other exhibitors	Meet the standards set by legal requirements?  Comply with recognized industry standards?  Represent good practice?  Reduce risks as far as is reasonably practicable?  <b>Have you provided:</b>  Adequate information, instruction and training?  Adequate systems or procedures?  If you have then you need to indicate the precautions that you have in place.  Where the risk is not adequately controlled indicate what more you need to do.
